(MERN Stack · React · Vite · Tailwind CSS · Node.js · Express.js · MongoDB · Mongoose · JWT · bcrypt · Zustand · Axios · Groq AI)

- Developed a **full-stack AI-powered travel platform** using the MERN stack, enabling users to explore destinations and receive personalized travel recommendations.
- Integrated **Groq AI (Llama 3)** to generate intelligent travel suggestions and itinerary recommendations based on user prompts.
- Implemented **secure user authentication** using **JWT** and **bcrypt**, ensuring protected access to user accounts and travel data.
- Designed and developed **RESTful APIs** with **Node.js**, **Express.js**, and **MongoDB/Mongoose** for authentication, trip management, and AI-powered features.
- Built a responsive **glassmorphism UI** using **React**, **Vite**, **Tailwind CSS**, and **Zustand**, delivering a modern and seamless user experience.
- Deployed the application using **Vercel** (Frontend), **Render** (Backend), and **MongoDB Atlas** for cloud database management.

Weather App — Real-Time Weather Forecast Application

[Live link](#) | [GitHub](#)

(React · JavaScript · HTML5 · CSS3 · Axios · Weather API)

- Developed a **responsive weather application** that displays real-time weather conditions, temperature, humidity, wind speed, and weather descriptions.
- Integrated a **Weather API** using **Axios** to fetch and display live weather data with efficient API handling.
- Implemented **city-based weather search**, loading states, and error handling for an improved user experience.
- Designed a clean, responsive interface using **React**, **HTML5**, and **CSS3**, ensuring compatibility across desktop and mobile devices.
- Optimized component structure and state management to improve application performance and maintainability.

INDUSTRIAL TRAINING

Full Stack Developer Trainee — Future Finder Pvt. Ltd., Mohali

Jan 2026 – Jun 2026

- Completed a 6-month Full Stack Developer training by developing TravelNest AI, a MERN-based AI-powered travel platform using React, Node.js, Express.js, MongoDB, JWT authentication, and Groq AI while following the SDLC.
